

SAGE SOFTWARE/VERSION	IS IT DUAL DISPLAY (DD) COMPATIBLE?	HOW CAN DD BE DONE?	AT WHAT COST?	WHAT ABOUT EURO MIGRATION?
Sage Line 50 v9 and above	Yes.	Some minor technical changes to report layouts.	By user with some technical know-how. By your SAGE supplier at a nominal labour charge.	The easiest method would be to enter opening balances for 2008 in a new company dataset. Alternatively, one could export and re-import outstanding transactions. This can be done by the user with technical know-how or by your SAGE supplier at a nominal labour charge.
Sage Line 50 v8 or below, including DOS	With some limitations*.	* Since these products are end of life versions, it would be more worthwhile purchasing an upgrade to a new SAGE version.	Starting from Lm230 + VAT.	The easiest method would be to enter opening balances for 2008 in a new company dataset. Alternatively, one could export and re-import outstanding transactions. This can be done by the user with technical know-how or by your SAGE supplier at a nominal labour charge.
Sage Pastel Partner (v2004, v2005, v 2007)	Yes.	Need to purchase a multi-currency add-on.	Add-on module for Pastel Partner costs Lm 110 + VAT. This add-on needs to be installed by user or by your SAGE supplier at a nominal charge.	Without the add-on module, one would have to enter opening balances for 2008 in a new company dataset. The add-on module has an automatic historical conversion routine, which not only generates a historic reference of transactions in euro but also brings across the account balances into a new euro company dataset.
Sage Pastel Evolution v3, v4	Yes.	Some minor technical changes to report layouts.	By user with some technical know-how. By your SAGE supplier at a small labour charge.	Without the add-on module, one would have to enter opening balances for 2008 in a new company dataset. The add-on module for Sage Pastel Evolution costs Lm260 + VAT. This add-on needs to be installed by user or by your SAGE supplier at a small charge. The add-on module has an automatic historical conversion routine, which, not only generates a historic reference of transactions in euro, but, brings across the account balances into a new euro company dataset.
